

Background

Calcasieu Parish School Board Career & Technical Education has 730 PCs. There are 36 Business Teachers, 3 Trade & Industry teachers that use NetSupport.

The Challenge

In our business and T & I labs we were looking for a software package that the teachers could use to monitor their students' progress and behavior. Also, we wanted a product that the teachers could use during their instruction. NetSupport School was the answer.

Situation

We have been using NetSupport in our parish for approximately four years. The teachers love the software. They give me positive feedback continuously. They feel the software is easy to work with and install. The teachers use the software daily in their instruction to demonstrate new techniques and procedures to the students.
