

## Background

Madison Academy has 130 PC's and 30 Employees. Madison Academy is a Senior academy high school with a one-to-one laptop program.

## The Challenge

How to monitor every student's laptop in our school. With our one-to-one laptop program, we must know what every student is doing all the time on their machine.

## Situation

We needed to monitor the students within the laptop program. Two years ago we provided every student in the school with a laptop with all textbooks in digital format.

## NetSupport Solution

We chose NetSupport School because of it's competitive price point and extensive feature set. Without NetSupport School, our high school would have never been able to successfully implement a one-to-one laptop initiative. With this product installed on each laptop, we never have to wonder what each student is doing online.
