

Rock Hill School District, SC

↳ The Challenge

"We were looking for software to monitor the students while they were using the computers and to also assist the instructor in running their classroom.

The first software product that we installed on our computers was VNC. The software is not even comparable to what NetSupport School can do for us!

We have NetSupport School installed on almost 125 computers at our school with five of our teachers using it on a daily basis to assist with instruction.

↳ The Solution

With over 1,000 students attending our school, we want to ensure that our computers are used for educational purposes only. NetSupport School helps us monitor the students and keep them on task!"

"We have fewer computer problems and labs are running smoothly!" - Technology Teacher
