

## ↳ Background

At the MacDill Aeronautical Academy at Robinson High School, you get a unique chance to learn, build, experiment, tour and enjoy various aerospace activities and sites. Our partnerships with MacDill Air Force Base, the Experimental Aircraft Association, Space Florida, the Space Foundation, Clearwater's National Aviation Academy and the Clearwater Aviation Academy open up a world of opportunities to understand the world of military and civilian aerospace.

Space is special in the spotlight this year with NASA's 50th Anniversary October 1st. We'll concentrate on its history and its future, researching missions and learning about satellites, orbits and other factors through Analytical Graphics Inc.'s STK animation software.

## ↳ The Challenge

As a public high school Aerospace Technology teacher at Robinson HS in Tampa, FL with 20 computers in the lab, I was looking for a computer management system that could also push information to the students. I have used an old version of Synchroneyes but that did not work on Vista.

## ↳ NetSupport Solution

NetSupport School has been added to the 20 computers in the lab and the result is dramatic. I can now control where the students go on the internet, the use of computers in general and the information flow to/from the students.

## ↳ Testimony

T.R. Robinson HS selected NSS for its Vista-running computer lab after an older computer management system no longer worked on the Vista-updated lab.

"NSS has been added to the computers in the lab and the result is dramatic. I can now control 'where' the students go on the internet, the use of computers in general and the information flow to/from the students. FANTASTIC!"
