

↳ Background

LaFayette Intermediate School in Waterloo, NY has been recognized by Commissioner Mills as a High Performing/Gap Closing School. LaFayette Intermediate School educates students in grades 3 -5. The staff is a team of dedicated educators who are committed to standards of excellence in academics as well as being people of good character.

↳ The Challenge

"We were looking to find a replacement program for Apple's remote desktop when our building switched from Mac to PC. I tried several products for remote control and school related features.

Currently we have 110 PC computers and Laptops at our Intermediate building. All computers have NetSupport School loaded on them. I looked at Ultra VNC, Net Op School, and Vision before ultimately choosing NSS because of its ease of use and fit for classroom leaning.

↳ The Solution

Implementing NetSupport School in our building had helped us tremendously. We are now able to log web/print usage, lock computers when we need for security and student focus, provide IT support from a central location, and save time while students are on the net by giving them links to the websites we want them to go to. Students are now able to spend more time working productively."
