

How NetSupport Notify outperforms emails

 NetSupport Notify	Email 
✓ Instant sending to everyone	Slow to set up 
✓ Real-time alerting	Asynchronous 
✓ Delivery confirmation	No confirmation 
✓ Pop-ups for immediate attention	Easy to ignore 
✓ Quick, saved customised notifications	Customisation takes time 
✓ Instant priority on systems	Emails may not be a priority on devices 
✓ Centralised management and control	May need multiple clients or accounts 
✓ Escalate alerts based on priority levels	Priority/escalation may not be available 
✓ Logs and reports all incidents	Difficult to keep logs and records 
✓ Secure, encrypted communication	Less secure, risking sensitive information. 
✓ Integrates with other systems	May require additional third party tools 

Why use NetSupport Notify?

Rapid Response

Instant notifications prompt a quick action from staff.

Reduced Downtime

Swift alerts minimise service disruptions.

Enhanced Safety

Early alerts improve safety measures.

Immediate Attention

A pop up, prioritised alert box with bright colours.

Proactive Issue Resolution

Early detection aids in resolving issues.

Resource Optimisation

Quick and easy to set up alerts helps to allocate resources.

Experience the power of real-time alerts with NetSupport Notify and leave email delays behind.
