

Helping K-12 Schools Prepare for a Digital Future

Published by Today's Modern Educator | By Jenna Sindle

K-12 schools experienced a profound transformation in the last 18 months as they pivoted to [online learning](#). As schools and districts evaluate their plans for the coming school year and prepare for a digital future what IT do they need? In this week's roundup we take a look at how K-12 schools are preparing for their digital futures, including tribal schools balancing maintaining heritage and tradition with new realities.

How Schools Can Create a Digital Strategy with Confidence

At last month's ITSELive 21 virtual conference, building a digital strategy was front and center resulting in plenty of guidance for K-12 schools looking to consolidate and refine their experiences from the last school year. EdTech leader, AI Kingsley "shared that most school districts have just over

1,000 pieces of ed tech, and added that district leaders should take advantage of existing tech that can track, monitor and manage, from a central point, all IT assets and endpoints across a school district. Knowing what ed tech tools are being used and how often can help teachers and students better maximize these tools with the added benefit of saving time and money and increasing security..."
