

Send notifications to staff anywhere, at any time with NetSupport Notify

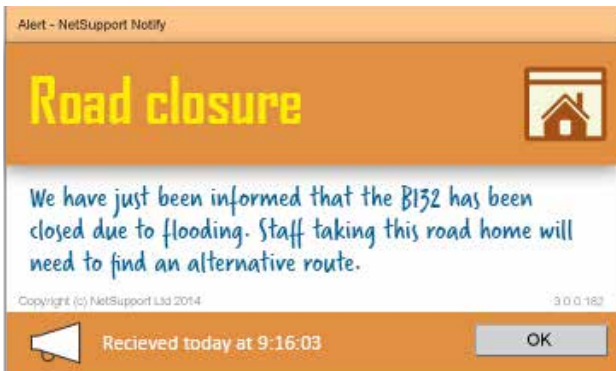

With a combination of on-premise and remote working occurring due to COVID-19, businesses across the globe are turning to mass notification tools to support their communication with staff in mixed working environments. From sending one-way messages that can't be ignored, to streamlining communication and ensuring everyone has received and read the message – NetSupport Notify can help!

NetSupport Notify can help you communicate...

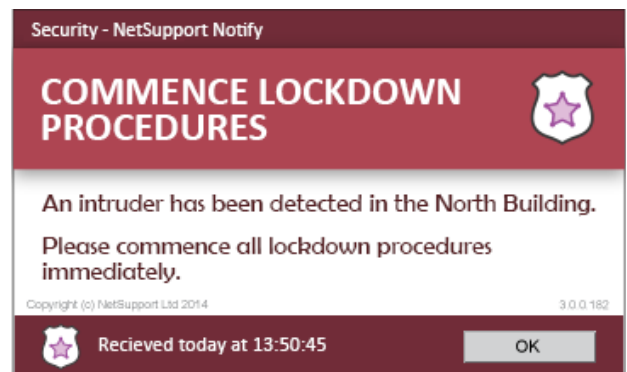

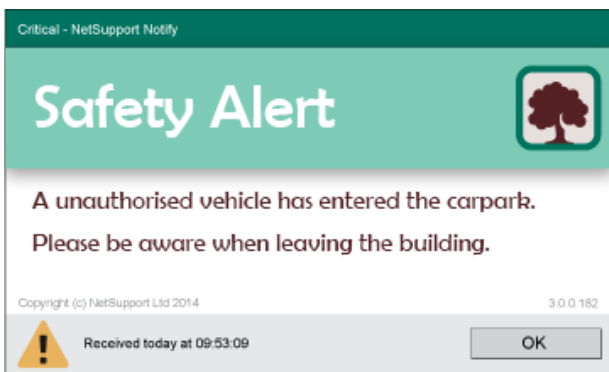

Sensitive information: Deliver sensitive information discreetly without using the overhead PA system – perfect in hospitals for code calls.

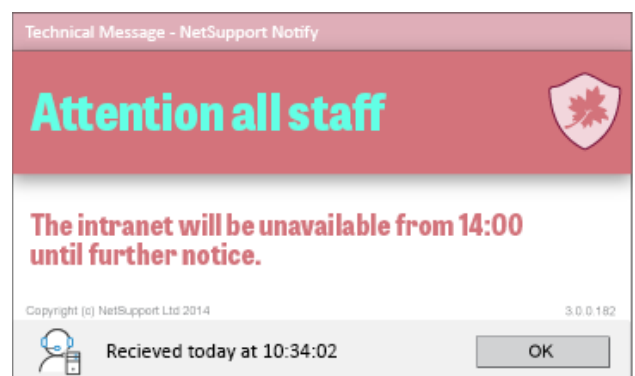

Adverse weather: Help keep your staff informed about any natural disasters or severe weather that may affect them.

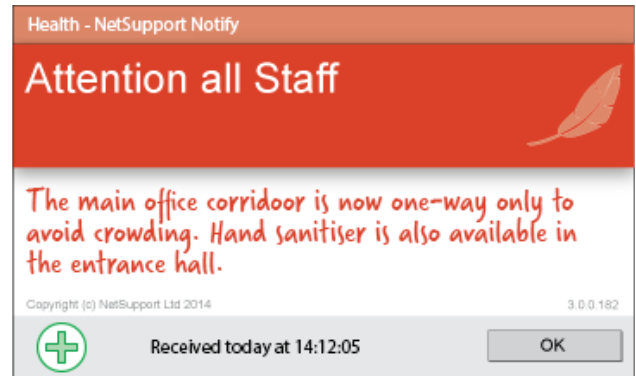

Emergency or lockdown procedures: Using a three-hotkey combination, quickly notify staff of emergencies (such as bomb threats or active shooter situations) so they can initiate any lockdown or emergency procedures swiftly.

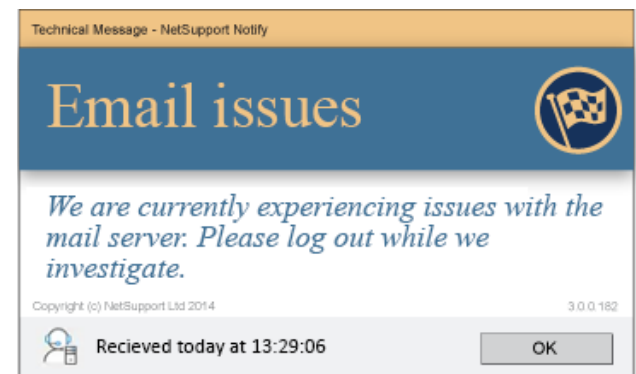

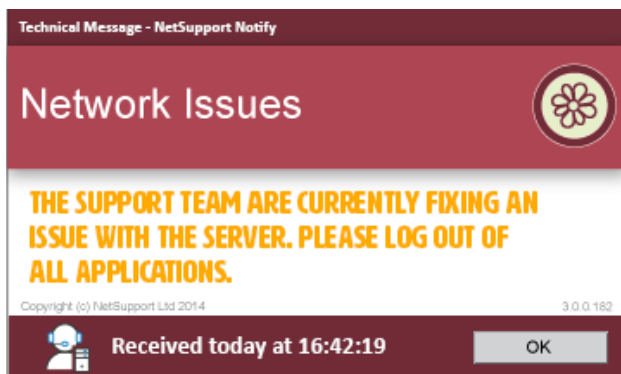

Recurring events: Schedule notifications for recurring events (such as routine system maintenance) or to notify staff to power off devices, for example.

Wellbeing/COVID-19 updates: Send important health messages and updates to keep staff safe.

Ad hoc scenarios: Share information or updates as and when necessary, such as unscheduled network downtime or email issues, for example.

“

We currently use NetSupport Notify and have done for a number of years now. It was a great find after we moved from a previous solution. It has been used during **critical outages** and **planned downtime** to inform our 6000+ users instantly.

No more ignored emails! A clear call to action, straight in front of them, that's hard to ignore. NetSupport Notify allows us to get a message in front of our users very quickly and with a clear **colour-coded** and **customisable** alert, it's a great way to communicate with the entire network instantly.
