

Elevator PITCH

Find out how ReallySchool can help teachers observe and assess in line with best practice – and save a heap of time!

1 What is ReallySchool?

ReallySchool is a cloud-based assessment solution for primary school teachers and TAs that allows you to capture, record and assess the stages of skills acquisition for every pupil in your EYFS, KS1 or KS2 classroom as you go.

2 Simple and accessible

Designed in the style of regular social media apps, ReallySchool is intuitive and easy to use (without training) meaning it's accessible for teachers who are less confident with technology. Its high-quality observations enable better lesson planning – a win for teachers and pupils.

“Before, we had to look back over each child’s records to see what they had and hadn’t done and work out the gaps for ourselves. Now, ReallySchool shows them to us straight away!”

**MRS WATERS, HEADTEACHER,
DOGSTHORPE INFANT SCHOOL**

3 Save time, increase efficiency!

You can apply assessments quickly and easily via ReallySchool’s comprehensive in-built UK-wide criteria. It automatically highlights any learning gaps, enabling you to address them. Teachers tell us that ReallySchool saves around two hours each day!

4 Engage and encourage

ReallySchool offers real value-add extras for schools: the ability to update and engage parents on their child’s progress via their own version of the app; a comprehensive range of reports for senior leaders; and awarding students badges for achievement.

ReallySchool is developed by NetSupport, a trusted provider of education IT solutions since 1989.
